

Schedule

8:30 AM: Introduction to Phenix and overview of tools for cryo-EM

8:45 AM: Map tools (density modification, sharpening, map symmetry)

9:30 AM: Break and computer setup

10:00 AM: Model building (docking, ab initio building)

10:30 AM: Atomic model refinement

11:30 AM: Validation (map, model, model to map fit)

12:00: Lunch

1:00 PM: Introduction to the GUI and setup

1:15 PM: Map improvement and model building

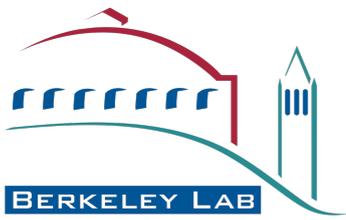

(DM, sharpening, symmetry, segmentation + automated model building)

3:00 PM: Break

3:30 PM: Refinement and validation

4:30 PM: User questions, more select tutorials, discussion, etc

5:30 PM: Finish

Program Project

Liebschner D, *et al.*, Macromolecular structure determination using X-rays, neutrons and electrons: recent developments in *Phenix*. *Acta Cryst.* 2019 **D75**:861–877

Phenix - a Structural Biology Hub

We have nucleated the development of new computational methods for structural biology

What is *Phenix*?

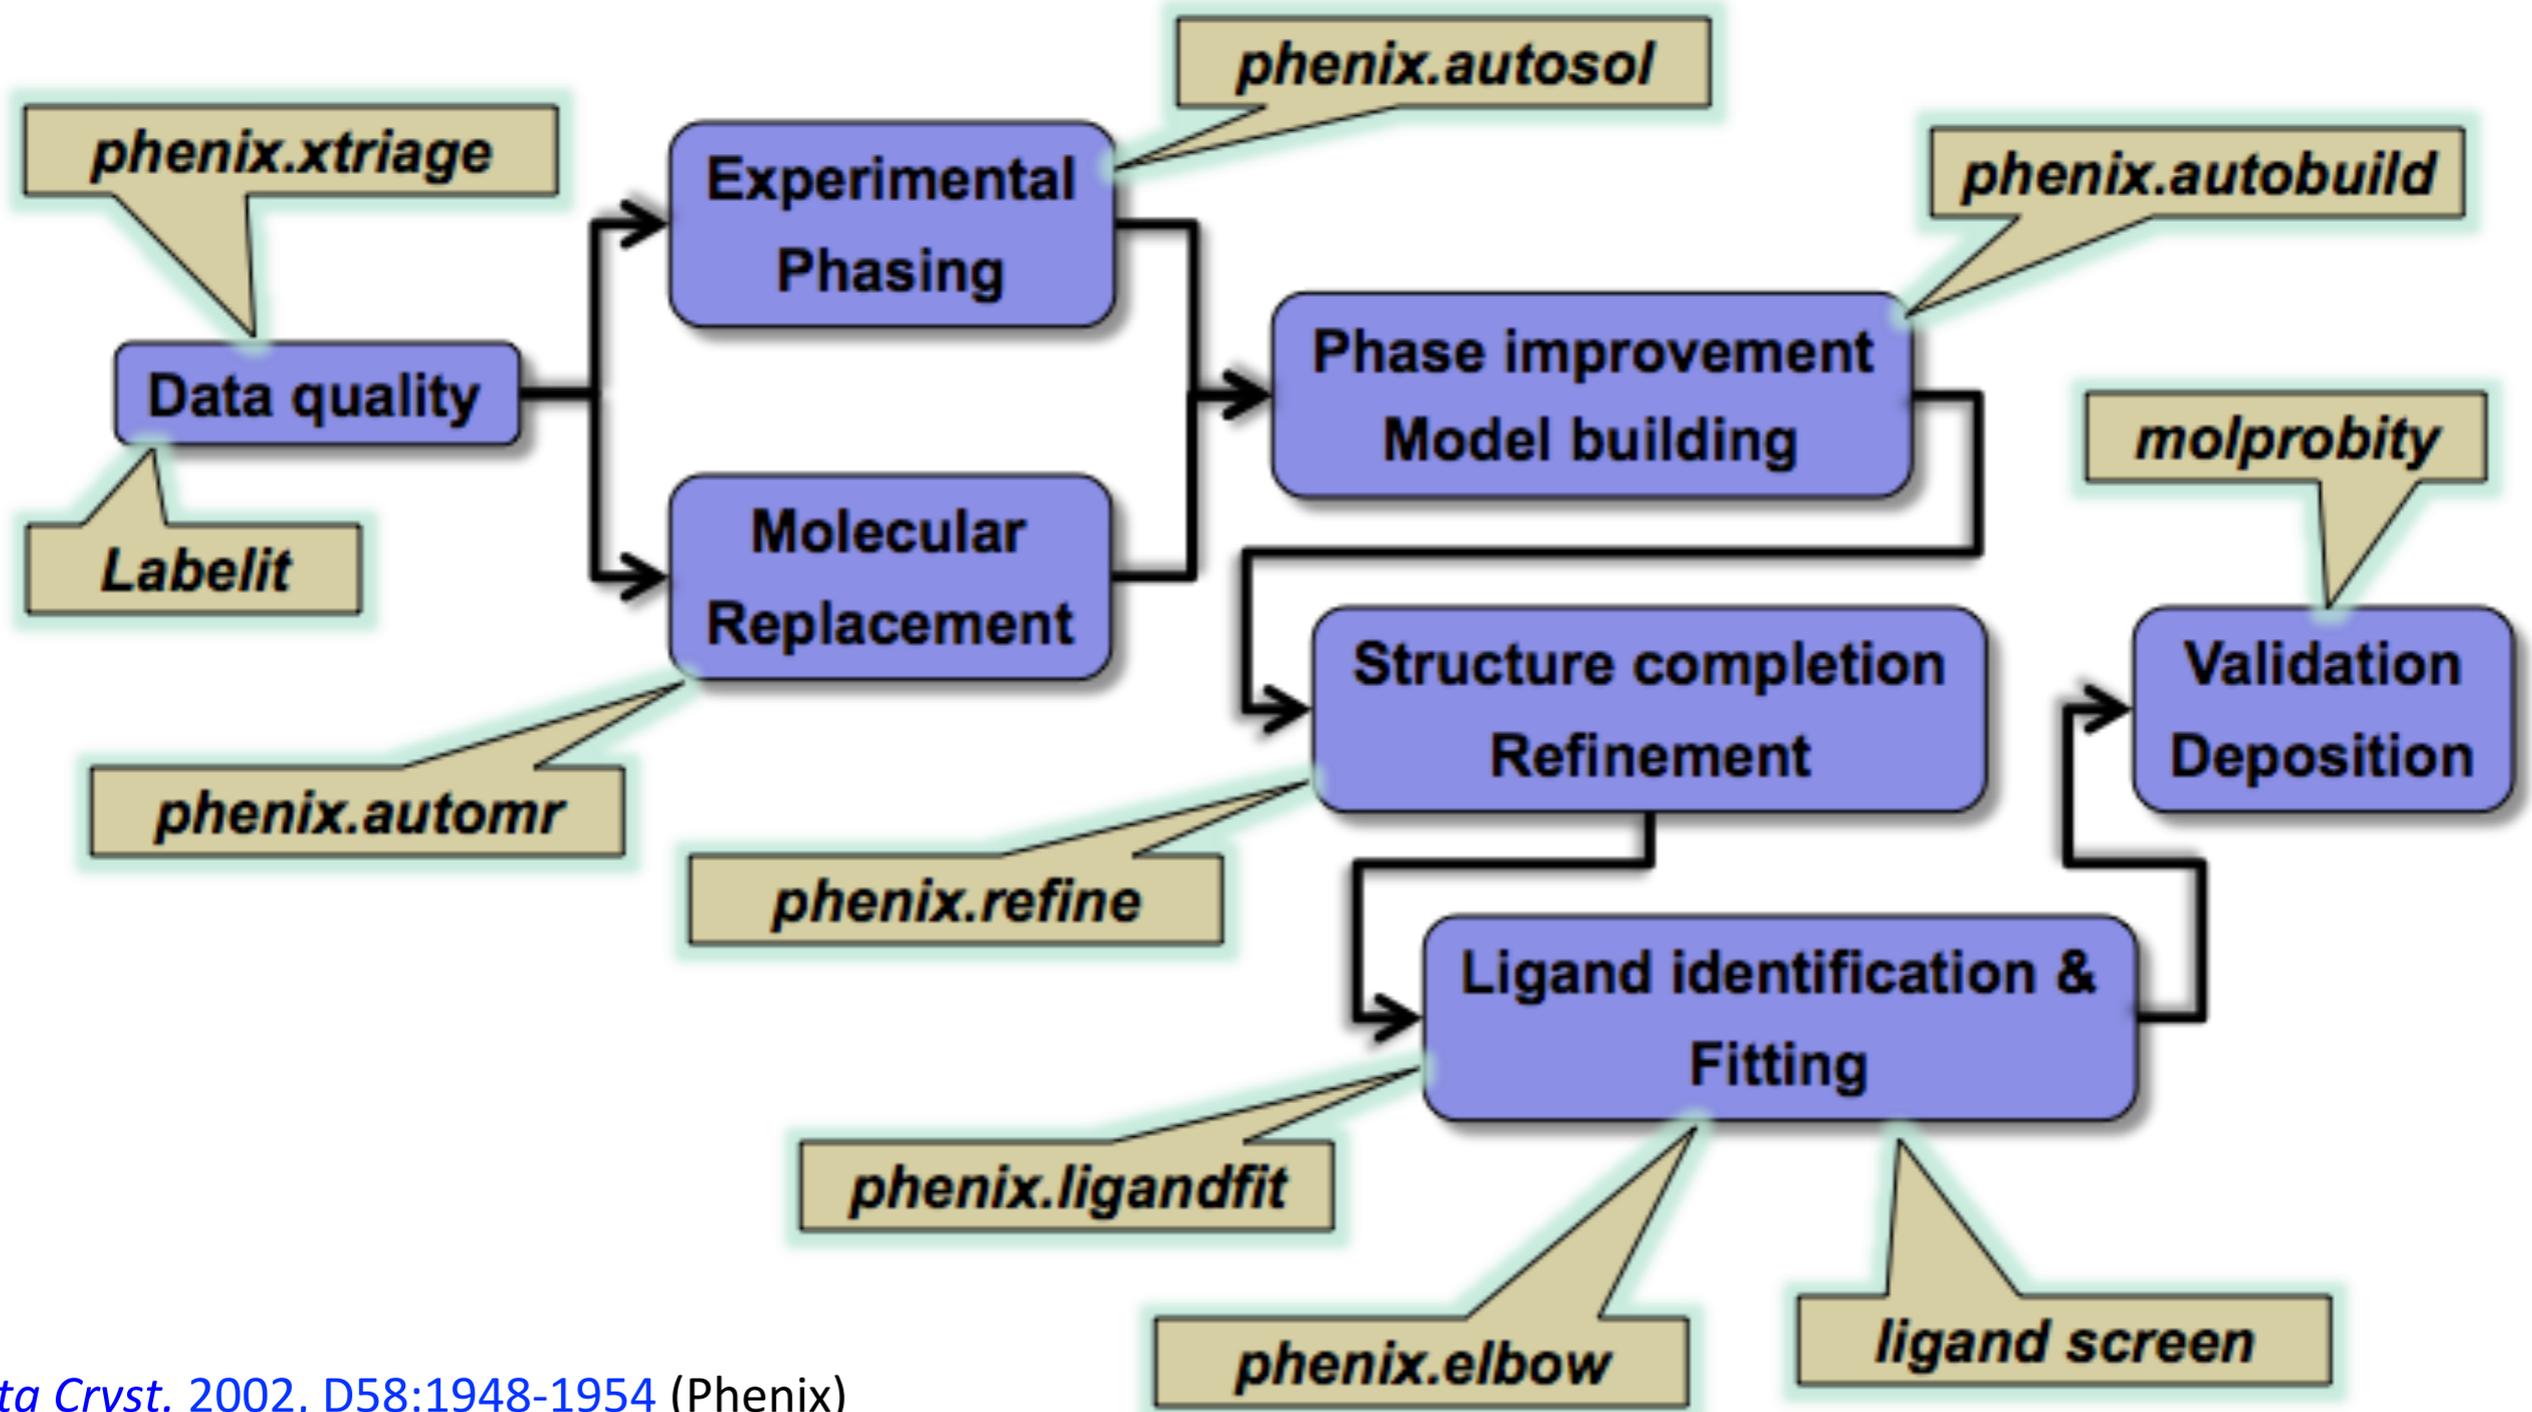

- Package for **automated structure solution**
- Modern programming concepts and new algorithm development
- Designed to be used by **both novices and experienced users**
- Long-term development and **support**
- Why is it called *Phenix*?

Python **H**ierarchical **E**Nvironment for **I**ntegrated **X**tallography

Key Features

- **Python**
 - Easy scripting of repetitive tasks
 - Enables rapid prototyping and development
- **Advanced algorithms**
 - Experimental phasing
 - Molecular replacement
 - Automated model building and rebuilding
 - Structure refinement and validation
 - Ligand coordinate and restraint generation
- **Rapid development and bug fixing**

Automation of Structure Solution

[Acta Cryst. 2002, D58:1948-1954](#) (Phenix)

[J. Appl. Cryst. 2002, 35:126-136](#) (cctbx)

[Acta Cryst. 2010, D66: 213-221](#) (Phenix)

[Acta Cryst. 2019 D75:861-877](#) (Phenix)

Phenix GUI

Central GUI to view job control and launch new jobs

The screenshot displays the PHENIX GUI interface. At the top, there is a menu bar with icons for Quit, Preferences, Help, Citations, Reload last job, Coot, PyMOL, KiNG, Other tools, and Ask for help. Below the menu bar, there are tabs for 'Actions' and 'Job history'. The main area is divided into two panels. The left panel, titled 'Projects', shows a table of project entries with columns for ID, Last modified, # of jobs, and R-free. The right panel, titled 'Favorites', lists various tool categories such as Data analysis, Experimental phasing, Molecular replacement, Model building, Refinement, Cryo-EM, Mtriage, Map to Model, Real-space refinement, Comprehensive validation (cryo-EM), EMRinger, ResolveCryoEM, Autosharpen Map, Dock in map, and Sequence From Map. At the bottom, there is a 'Current directory' field showing the path /Users/dcliebschner/Documents/rotavirus-model-building and a 'Project: rotavirus-model-building' label.

Favorites

Data analysis

Experimental phasing

Molecular replacement

Model building

Refinement

Cryo-EM

Mtriage
Analyze quality of maps in CCP4 format

Map to Model
Model-building into cryo-EM and low-resolution maps

Real-space refinement
Automated refinement using real-space maps (Cryo-EM, X-ray, ...)

Comprehensive validation (cryo-EM)
Model quality assessment, including real-space correlation, for cryo-EM structures

EMRinger
Model validation for de novo electron microscopy structures

ResolveCryoEM
Density modify cryo EM maps

Autosharpen Map
Tool for sharpening a map

Dock in map
Tool for docking a model in to map

Sequence From Map

Current directory: /Users/dcliebschner/Documents/rotavirus-model-building Browse...

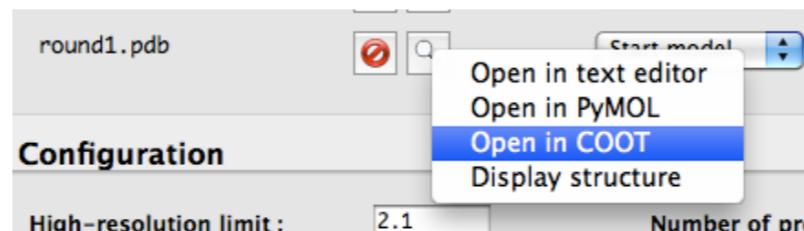

PHENIX version dev-svn-000 Project: rotavirus-model-building

Coot/PyMOL integration

- Most results can be opened directly in graphics apps

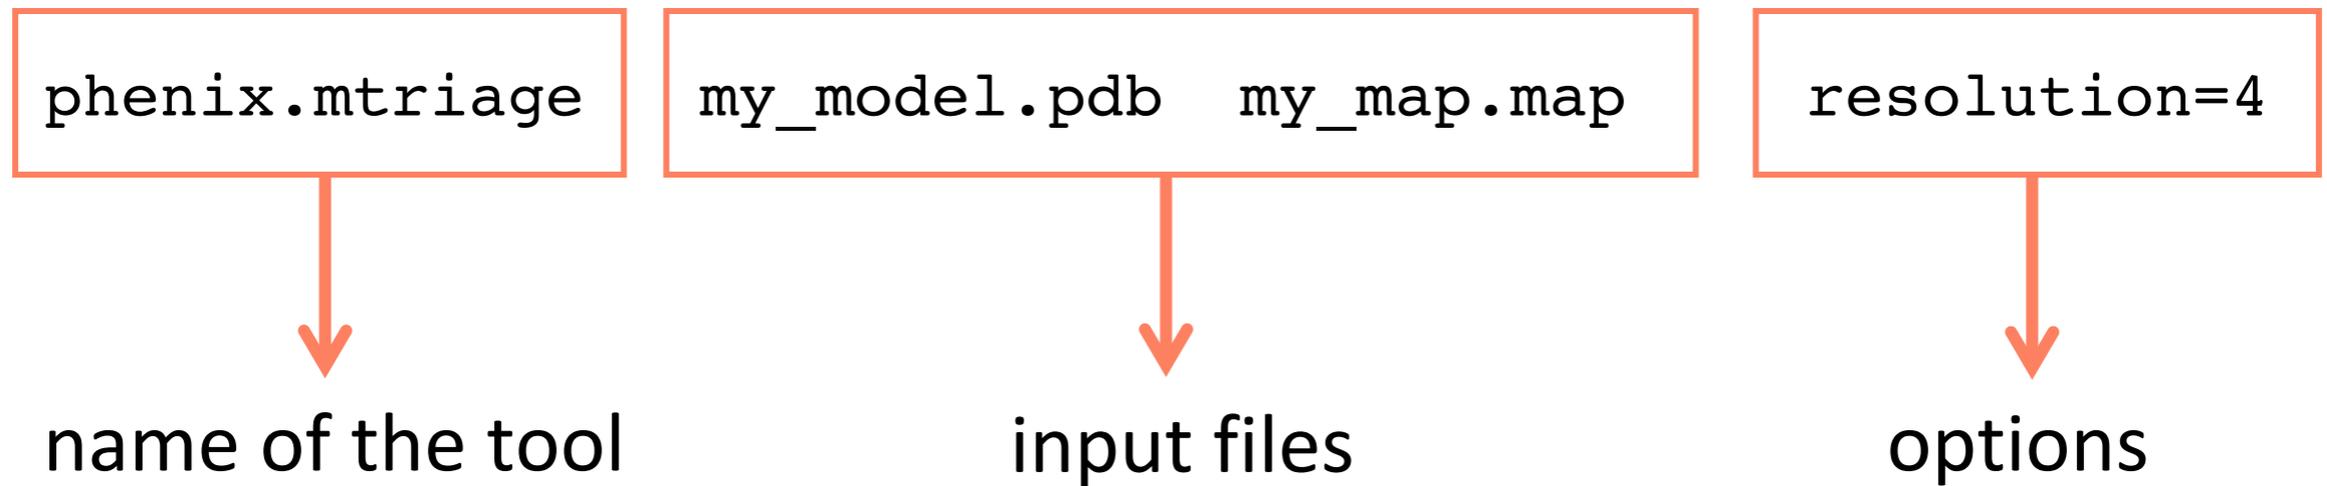

- Any PDB file listed in GUI can also be opened

- AutoSol, AutoBuild, and phenix.refine will update Coot continuously while running
- Coot must have Python support (default on Mac)
- Specific paths to executables usually required on Linux
 - Preferences -> Graphics -> Full path to Coot [...PyMOL]

Command Line Tools

- **Run on the terminal**

- **Run via a script**

```
try:  
    easy_run.call("phenix.mtriage my_model.pdb my_map.map")  
except Exception as e:  
    msg = traceback.format_exc()  
    print(msg)
```

Phenix Availability

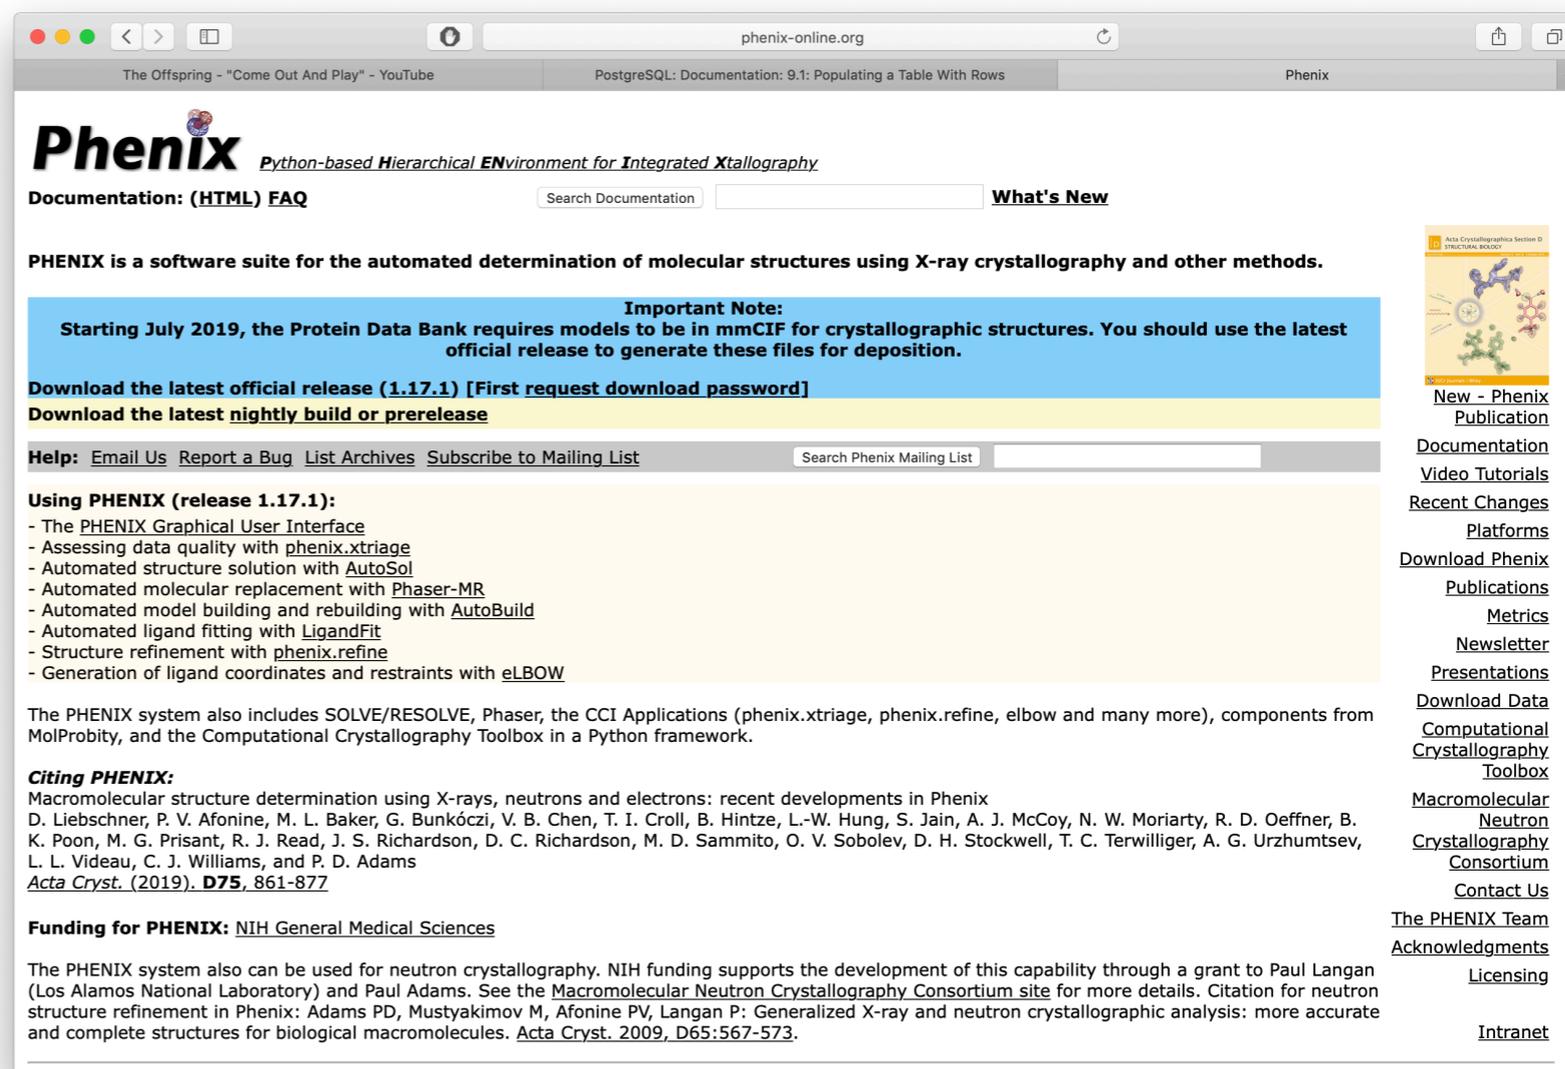

phenix-online.org

Supported on:

- Linux (RedHat, Fedora)
- Mac OSX
- Windows

Extensive documentation

Nightly builds:

The screenshot shows the Phenix website homepage. At the top, there is a navigation bar with links for "Documentation: (HTML) FAQ", "Search Documentation", and "What's New". Below this, a blue banner contains an "Important Note" about the Protein Data Bank requirements starting in July 2019. A yellow banner below that provides links to "Download the latest official release (1.17.1)" and "Download the latest nightly build or prerelease". The main content area lists "Using PHENIX (release 1.17.1)" with a list of tools and their functions, such as "The PHENIX Graphical User Interface", "Assessing data quality with phenix.xtriage", and "Automated structure solution with AutoSol". A sidebar on the right contains a vertical list of links including "New - Phenix Publication", "Documentation", "Video Tutorials", "Recent Changes", "Platforms", "Download Phenix Publications", "Metrics", "Newsletter", "Presentations", "Download Data", "Computational Crystallography Toolbox", "Macromolecular Neutron Crystallography Consortium", "Contact Us", "The PHENIX Team", "Acknowledgments", "Licensing", and "Intranet".

Open in Coot Export Table 1

White cells are mostly informational.
Green cells imply that the values are in an acceptable range.
Yellow cells imply that the values need to be checked carefully.
Red cells imply that the values are concerning and that the model should be checked very thoroughly.
Clicking on a row will bring up a panel with more detailed information.

Model		Ramachandran	
MolProbity		Outliers (%)	0.00 (Goal: < 0.2%)
MolProbity score	1.72	Allowed (%)	6.45
